

TRUCKS FAIL TO WORK —NARROW ESCAPE

Saturday Mr. and Mrs. John T. Hallinger and their three children of Murray had a narrow escape from death when their auto came near capsizing into the creek in American Fork canyon. They were driving behind a Ford near the bridge between the 1st and 2nd power plant, going up the hill. The driver of the Ford stopped his car to shift gears, which caused the latter car also stop. His wheels failed to work properly and the car backed down the hill and off the edge. Two wheels were smashed and other damages done to the car. None of the occupants received a scratch. The Hitchner-Werner garage brought the car down and made the necessary repairs. It was really a miraculous escape and was considered so by the occupants of the car.

Narrow Escape for Some Former Am. Fork People

Sunday's Tribune gives the following account of an auto wreck which former American Fork people were in: Mr. and Mrs. C. W. Rushton of Salt Lake returned yesterday from a trip to Yellowstone national park that was not altogether satisfactory. They wanted to see the wonders of the park by automobile in company with Mr. Rushton's parents, Mr. and Mrs. M. H. Rushton, of Idaho Falls, and Mrs. S. A. Elmore of Salt Lake. "Fisher was driving the car," said Mr. Rushton, "when we met another machine, and it was necessary to pass where the grade, which was new, was rather narrow. We were on the outside, and when some of the new grade gave way under our car, the machine slid down the embankment a ways, then turned completely over and landed right side up in about three feet of water. The grade was about forty feet above the river and I cannot understand why at least some of us were not killed.

"I escaped without a scratch, but I was the lucky one. All of the others received bad bruises and lacerations, although there wasn't a bone broken. The machine was so badly damaged that we left it by the road there. We pulled it out of the river, but it wasn't worth bothering with further. Others helped us up the bank and a stage took all of us to the Canyon hotel, where medical attention was available. After staying there two days, we decided that we had seen enough of the park for this summer and left for home.

"Mother and Mrs. Elmore were badly shocked from the fall and Mrs. Elmore stopped with my parents in Idaho and the three of them are under a doctor's care there. Mrs. Rushton and I came home, but Mrs. Rushton still is nervous from the trip and isn't enthusiastic about the park."

LEGION GALA DAY QUEEN CONTEST

Voting for Gala Day Queen opened up with considerable brilliancy on Wednesday. This contest will undoubtedly bring to our notice the unexcelled beauties, heretofore unpublished. We will really learn that our fair city is not entirely void of loveliness. Already we have our attention called to these twenty-one and expect that many more for next week's time.

Votes early, late and all the time for your favorite.

Voting stands will be found at each drug store.

CANYON CROSSCUTS

Word was received Sunday that the Belorophon mine had made an important discovery in a raise from the lower tunnel, consisting of several feet of high grade shipping ore and an unknown quantity of splendid milling ore lying alongside it. This has been confirmed by Burt Durrant and others who have seen it. It is said they are putting in an ore chute and that shipping will no doubt start within a reasonable time thereafter. The strike is said to have been made in a raise from the lower tunnel level.

An important high grade development is said to have been made upon the Silver Dipper claim which is under lease by the Treasure Hill Mining Co. This claim has produced high grade ore in the past and it is hoped the continuation of the ore has been found. Two or three worked all last winter and a larger force has been engaged all summer. It is understood that Judge Hatch of Heber and associates are interested in this company.

The Bog Iron tunnel is said to have reached the porphyry. The dyke is expected to be from 20 to 30 feet in thickness with the ore probably on the farther side. At any rate the reaching of the porphyry is favorable development and indicates that the surveys have so far been born out by the developments in the long tunnel.

A great many campers and others have made the canyon populous all summer, in fact, more have been in than ever before which speaks volumes for the splendid canyon as a camping place and resort.

There is considerable activity in the mines and there is a constant stream of travel over the road.

Beautiful and inspiring is the trip up American Fork Canyon to MT. TIMPANOGOS.

High School Credit

At a meeting of the high school principals Tuesday, July 27th, it was decided that students should be given credit for the 36 weeks of school if they attend the 36 weeks. Credit will be given for summer work during the summer, provided the summer work is of such a nature that it has educational value. Many of the pupils will not be able to attend more than 30 weeks of the 36 weeks. 12 credits are given for 36 weeks of work and 10 credits will be given for 30 weeks of work.

Heretofore 45 credits have been required for graduation. Beginning with this year 48 credits will be required for graduation.

Both Swear to Complaints

Last Tuesday afternoon there was a "mix-up" on Center street between Arthur Laycock and his divorced wife and her husband. Later in the week Mrs. Goff swore to a complaint charging her husband with abusive treatment and disturbing the peace. He pleaded not guilty and his case was set for 2 o'clock today.

Laycock also swore to a complaint against his former wife for assault and battery and her case is also expected to be heard Saturday.

Better Service and Closer Co-operation

Roy L. Roberts, of the Salt Lake & Utah R. R. Co., (the Orem line), spent Wednesday in American Fork interviewing some of the business men in the interest of the road. Mr. Roberts will spend next week here and the following week at Pleasant Grove for the purpose of establishing a community interest in the Orem road. The idea is better service on the part of the road and closer co-operation with the merchants and the people in general.

In American Fork Tuesdays and Fridays.

I will be very pleased to meet you in my new location.

What It Means

Many people do not know what a bank's Capital is for, or the difference between a bank of little or no capital and one with large capital.

A BANK'S CAPITAL

Is the fund that protects the depositors from loss; therefore the larger it is, the greater protection the depositor has. This bank has a

Capital of	\$50,000.00
Surplus of	55,000.00
Reserve of	45,000.00
Undivided Profits	27,000.00
Additional Stockholders Liability ..	50,000.00
	\$227,000.00

This means that we must lose \$227,000.00 before our depositors could lose a cent. This protection is for YOU. When you think "Bank" think "OLD RELIABLE."

Bank of Am. Fork

29 YEARS SUCCESSFUL BANKING

PIONEER DAY WAS QUIETLY OBSERVED

Pioneer day, July 24th, was very quietly observed here, Saturday. The flag was raised at sunrise and many salutes were fired. The base ball game between Midvale and the locals was the only celebration out of the ordinary. It was a fast and interesting game however, and was well attended.

The Fourth ward M. I. A. officers carried out a very novel scheme when they erected a stand on the old bridge east of town and sold ice cream, popcorn, lemonade, buttermilk, etc., the proceeds of which were for the M. I. A. Hut in the canyon. They stopped nearly everyone that passed through the city, and most of them were willing to help and do their bit. A neat little sum was realized.

Many of our townspeople attended the nearby resorts and the canyon, while others were at Pleasant Grove and other out of town places.

A good crowd patronized the shows and a fine bunch enjoyed the dance at the Apollo.

American Fork's big celebration is yet to come when our roads are all completed and we begin to feel like a city once.

Foundation In For New Condensary

The cement foundation for the new creamery is now completed. It was done by the Chipman Merc. Co. and is now ready for the brick work to begin. It is understood that the building will be rushed to completion.

This week the local painter painted the large sign board, telling the traveling public that "This is the site for Utah County's new milk condensary."

Too Much Speeding on Main Street

Now that the paved road is useable along Main street, some of the auto drivers seem to be taking advantage of it and abusing the speed limit. While we know it must seem like "paradise" after all the bad roads we've had, yet we think that reason and common sense should be used by the drivers and the speed law enforced by the officers.

Mixing Plant Broke

Part of the mixing plant, which makes the "hot stuff" broke and consequently no work was done on Thursday. One more day's work will see the north side of the road finished and then work will commence on the south side of the road and the Orem tracks.

Second Ward at the M. I. A. Hut This Week

Monday morning the Boy Scouts and Bee Hive girls of the Second ward left to spend a week at the M. I. A. Hut in the Canyon. The boys made the trip up about. They left here near 6 a. m. and arrived at camp at 10 a. m. (walking the 14 miles in 4 hours). They have gone on several hikes of interest and Wednesday they made Mt. Timpanogog, with B. N. Christensen acting as their guide.

The American Fork 4th ward will take their week commencing next Monday, August 2nd.

Primary Festival Success

The Primary festival held at the tabernacle grounds last Friday night was a grand success. Fully 1000 people were out to witness the little dances and games which were staged by the little tots, under the direction of the Primary officers. The forepart of the program was held on the lawn, which were brilliantly lighted for the occasion, but before the program was half over the rain began to fall and the crowds were forced into the building, where the remaining part of the program was given.

The refreshments that were on sale were gone in a very short time and the Primary officers, as well as the large audience, expressed their satisfaction for the splendid success of the entertainment.

Alpine Stake Mutuals Will Hold Rally

The Alpine Stake Mutuals will hold a rally at Saratoga Wednesday, August 10th. The people of the stake are all invited to attend. The following program has been arranged:

Speaker, Anthony N. Ivins, Salt Lake City; reading, Louis West; band music by the band; quartette from the Manila ward; games under the direction of David Gourley; chorus, under direction of Prof. Overlade of Pleasant Grove; and a solo under the direction of Prof. Paxman.

The program will commence at 5 p. m. and a good time is assured to all.

Road Work Between Here and Lehi Progressing

The cement road work between here and Lehi is progressing very nicely. The work has been done from our city limits out to the forks of the road and will soon be ready for use.

Lehi will have both upper and lower Main street paved. Their roads are of solid concrete and a very good chance to compare the two different grades of roads can now be had after they are both in use.

Visit OLD MT. TIMPANOGOS—The easiest trail is up thru American Fork Canyon.

Perfection's Price In Tire Building

A tire-maker's first problem is to decide how much he can give for the money. This, and every other question in tire building, depends upon policies.

A super-tire, such as The Brunswick, can be made only by a concern which knows well and appreciates that there is nothing exclusive in the tire industry except high standards.

Since 1845 the House of Brunswick has held first place in every line it entered. Brunswick Tires, as more and more motorists come to know them, will certainly be awarded that coveted place held only by the superfine.

Motorists who buy one Brunswick usually adopt it for complete equipment. Yet this is not strange, since the first one so completely proves its superiority.

If the name of Brunswick certifies to you, as to most men, an extraordinary tire, at no higher price, would it not be good business to test one or two Brunswick Tires?

Meeting Next Sunday Night

There was no meetings here Sunday afternoon nor at the tabernacle Sunday night, on account of conference which was held at the Pleasant Grove grove that day.

The meeting next Sunday night will be under the direction of the Mutuals of the town, with the Third ward in charge. A good program has been arranged for and the public are urged to attend.

Labor Day Legion Gala Day.

The Legion boys have a big treat in store for the citizens of our vicinity, on Labor Day, Sept. 6th. The whole day will be a verisified, prolonged treat. Pageants, vaudevilles, ball games, music—"rare as a day in June." Get ready and keep ready, be one for once with our legion boys.

Beautiful and inspiring is the trip up American Fork Canyon to MT. TIMPANOGOS.

How Graphite is Mined.

The mining and purification of graphite used in lead pencils is not unlike the process of silver ore. It is generally found mixed with quartz, silica and mica. It is necessary to pulverize the rock with crushing machinery, which is followed by the extraction of the graphite. Before the graphite is mixed with the clay it is strained through very fine silk sieves, so that all particles the least bit coarse may be removed.

Men's Rights.

Men's rights are a great deal of trouble to them. They assert them, and get them, and then they don't know what to do with them. A man's rights, half of them, are meant to give away. . . . The bestitude of your rights is, they are your benevolences. You can yield them, give them away. And the law of social unity is this law of assertion of a man's individuality, and the use of that individuality as a benevolence for those that are round about him.—Henry Ward Beecher.
